Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to the recording tape cartridge apparatus, classified in class 242, subclass 348.
- II. Claims 19-20, drawn to method of manufacturing a recording tape cartridge, classified in class 264, subclass 645.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case each of the elements of the cartridge case can be formed as one piece rather than forming each of them separately.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
